

CAPABILITY STATEMENT

Our core capabilities are driven by our experience, reputation, and resources in the cost-effective supply and installation of commercial roofing and architectural cladding

INTRODUCTION

Since 2007 **Professional Plumbing Contractors Pty Ltd** has offered high-quality commercial roofing and cladding services in Melbourne and across regional Victoria. Privately owned, with a large employee base consisting of Daniel Bowman as a working director, office administration staff, and direct site employees.

Our specialist team is driven by the highest of standards to quality, efficiency and safety. We offer a thorough project management and consultation service to our clients to comprehensively plan each step of their project requirements. Understanding our clients' objectives and vision is our priority. This allows us to establish plans to ensure works are completed within allocated time frames. We have built a remarkable reputation of trust with our key clients, which is a testimony to the focus and discipline that we bring to every project that we undertake.

We work hard to build strong relationships with our clients, partners, suppliers, people and the wider community.

OUR CAPABILITIES

Estimating, Technical Advice and Project Management

We work closely with our clients using estimating and project management solutions to ensure all requirements and specifications are examined. This information is imported to our programs for consideration and allows us to comprehensively review the project needs, limitations and risks present with every task. Our project management team provides extensive detailed design advice to architects and designers, to help resolve any possible budget and construction hurdles. This provides a level of assurance and ease once construction is underway to have solutions when potential challenges occur.

Professional Installation Of Roofing / Architectural Metal Cladding

Professional Plumbing Contractors understands the ongoing requirements of the industry. Our specialised installers and professional plumbers are available to help at any site, throughout Melbourne and regional Victoria. We are always on-call for the major projects we get involved with and work hard to build strong working relationships with our clients, partners, suppliers, people and the wider community.

Highly Skilled Installers and Plumbers

Specialising in commercial roofing and metal cladding installation, along with professional roof plumbing services, our expert team can fulfil all types of project work from high-rise office structures to commercial and residential developments.

Focus on Quality and Certification

We pride ourselves on our quality of workmanship within the building industry with highly qualified personnel. To assist us in achieving this, we have a general employee induction process as well as comprehensive safety training plans. As a result, we can ensure that all work conforms to industry-approved Quality Assurance Plans, Occupational Health, and Safety standards, as well as regulatory requirements. And with our active apprenticeship/traineeship program, including ongoing training for qualified employees, PPC provides a well-defined career path and advancement opportunities for future leaders.

End To End Supply Connections To Service Your Building Project Needs From Start To Finish

We aim to provide our clients with a complete end to end solution, from start to finish, ensuring quick turnaround and limited outage times. This provides a level of assurance and ease once construction is underway to have solutions when potential issues occur. The PPC team takes great pride in delivering work which is second to none in safety, efficiency, and quality.

Our commitment to quality has built our reputation as a respected provider of commercial, industrial and high-end residential professional plumbing services in Melbourne and greater Victoria.
